SUMMARY

A positive and inquisitive-minded junior developer who has completed 3 years of Advanced Diploma in Conestoga College. I enjoy digging deeper into problems and finding their root causes. I am ready to put my best towards higher responsibility.

TECHNICAL SKILLS

Languages: Intermediate **C#** and **JavaScript/Delphi/React/Kotlin** experience, understanding of **OOP**

Database: understand **RDBMS** and able to write queries using **SQL**

Technologies: ASP.NET MVC, jQuery, Node.js, Angular, React.js, WinForms, Android Studio

PROJECTS

Virtual Game Store

Sep 2023 – Dec 2023

- o Created a Virtual Game Store App with **ASP .NET Core MVC**.
- o Implemented features of Sign Up, Login, Forgotten/Reset password, Profile, Preferences, Address, Selecting Games, Game Recommendations, Wish List, View Wish List, Friends and Family, Events, Rate Games, Review Games, Cart, and Download

Bell Geekfast Hackathon Team Project

August 2023

- o Participated in a 3-day hackathon focused on creating technology solutions for Online Privacy and Security.
- o Developed the privacy protection Chrome extension that employs **React** and **Vite** for the front end, with a Flask backend implemented in Python utilizing the **OpenAI API**.

PROFESSIONAL EXPERIENCE

Manse eSolution, Fergus, ON

Aug 2022 – Aug 2023

Junior Software Developer & Data Analyst

- o Worked on updating the address book feature, a Grain Management System core component developed using **Delphi**.
- o Built a project that displays markers on a map according to the customer's address book and allows the indicated markers to be selected, grouped, and used flexibly using API.
- o Database redesign of core tables and entities, updated application code to reflect the database changes using **MySQL**.
- o Made an installer for the customer using a script-driven installation system.
- o Created reports that could be printed according to the program's new features and produced custom reports to meet customer requirements using crystal reports.
- o Changes in program design to improve customer interface.
- o Understand client requirements and address defects/enhancements as appropriate.
- o Work on upgrading scripts and deploy enhancements/fixes to existing customers.
- o Provided technical support, installing and configuring software on the client's computer.

EDUCATION

Conestoga College, Waterloo, ON

Computer Programming and Analysis (Co-op), **GPA: 3.77 / 4.0**
