SUMMARY

A positive and inquisitive-minded junior developer who has completed 3 years of Advanced Diploma in Conestoga College. I enjoy digging deeper into problems and finding their root causes. I am ready to put my best towards higher responsibility.

TECHNICAL SKILLS

Languages: Intermediate **C#** and **JavaScript/Delphi/Kotlin** experience, understanding of **OOP**
Database: understand **RDBMS** and able to write queries using **SQL**
Technologies: ASP.NET MVC, jQuery, Node.js, Angular, **React.js**, **WinForms**, Android Studio

PROJECTS

Virtual Game Store   Sep 2023 – Dec 2023

- o Developed a virtual game store app using **ASP.NET Core MVC**, streamlining user experience and enhancing functionality.
- o Integrated essential features including Sign Up, Login, Forgotten Reset password, Profile, Preferences, Address, Selecting Games, Game Recommendations, Wish List, View Wish List, Friends and Family, Events, Rate Games, Review Games, Cart, and Download Bell, improving overall user engagement and satisfaction.

Bell Geekfast Hackathon Team Project   August 2023

- o Developed a Chrome extension for online privacy protection using React and Vite for the front end, with a Flask backend implemented in Python leveraging the **OpenAI API**.
- o Contributed to a 3-day hackathon focused on creating innovative solutions for Online Privacy and Security.

PROFESSIONAL EXPERIENCE

Manse eSolution, Fergus, ON   Aug 2022 – Aug 2023

Junior Software Developer & Data Analyst

- o Redesigned Grain Management System's address book feature, improving performance with **Delphi**.
- o Developed a flexible map marker selection system using **API**, integrating with the customer's address book.
- o Optimized **MySQL** database design and application code, enhancing efficiency.
- o Created a customizable installer for clients, automating software deployment.
- o Designed and implemented comprehensive reports using **Crystal Reports**, meeting customer's unique needs.
- o Changes in program design to improve customer interface.
- o Understand client requirements and address defects/enhancements as appropriate.
- o Work on upgrading scripts and deploy enhancements/fixes to existing customers.
- o Provided technical support, installing and configuring software on the client's computer.

EDUCATION

Conestoga College, Waterloo, ON

Computer Programming and Analysis (Co-op), **GPA: 3.77 / 4.0**
